GREENFIELDS TX SW

SEMI-WATER HOCKEY PITCH FOR CONSISTENT PLAY BOTH WET
AND DRY

Key benefits:

- Excellent grip thanks to the tight tufting of the artificial turf
- Steady sand-based pitch with optional wet play
- Total control for the improvement of playing technique
- Extremely durable thanks to TX monofilament yarn

GreenFields TX SW is the optimal artificial pitch for players wishing to develop their technical skills. The stable pitch enables full ball control. The advanced TX monofilament fibre technology results in a smooth surface with long lasting performance.

GreenFields TX SW is partially filled with sand, offering stability and grip for the player. Irrigation is an option for faster play, increased comfort and greater safety, but it is not a standard requirement. This allows water consumption to be controlled. The dense surface with a high amount of filaments/m² assures good water retention for a longer duration.

GreenFields TX SD is a FIH National certified product in combination with several types of elastic layers to suit the local installation conditions best. It is an ideal product for clubs that want a high performance product but where irrigation possibilities are limited.

YOUR PERFORMANCE

This GreenFields performance chart gives a first indication of the relative performance compared to our other products in the same category. GreenFields offers a perfect pitch for every player, and can provide a product that best suits your needs. For further advice, please consult your GreenFields sales representative.

BALL SURFACE INTERACTION
Covers the relative performance for ball rebound, speed, consistency and deviation.

PLAYER SURFACE INTERACTION
Reflects the relative score on optimal grip, comfort, hardness and shock absorption of the surface.

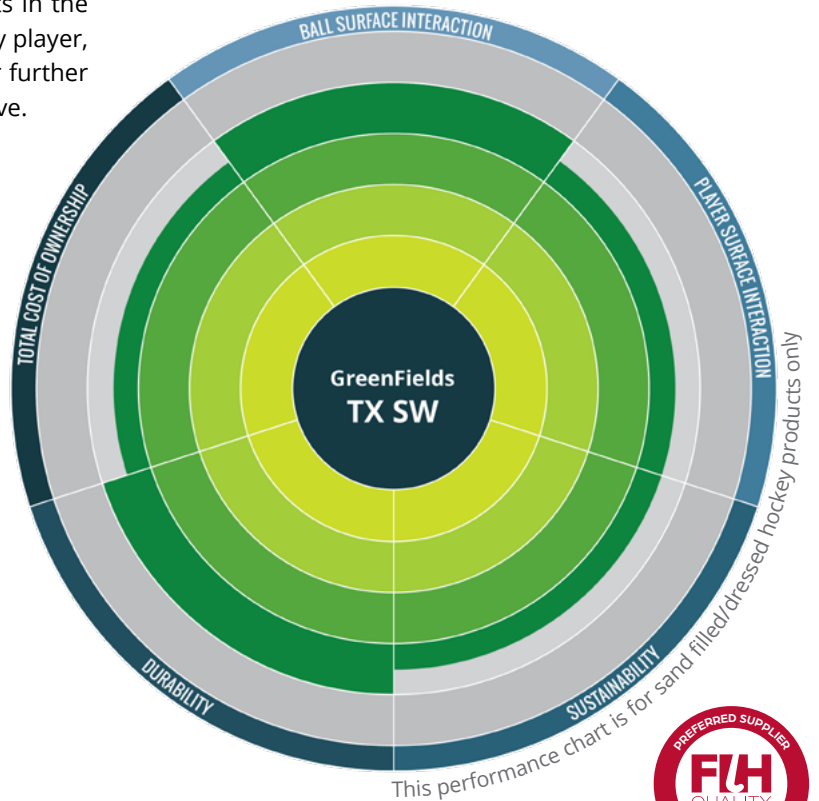

SUSTAINABILITY
Covers the needed irrigation, water retention, environmental footprint and recyclability.

DURABILITY
Reflects the relative durability of the carpet in terms of fibre wear and strength, color fastness and yarn bind.

TOTAL COST OF OWNERSHIP
Reflects the relative costs of the carpet, system components, maintenance and end-of-life.
