LESS INFILL NEEDED FOR HIGH PERFORMANCE

GREENFIELDS SLIDE MAX ST

Key benefits:

- ✔ Durable high performance fibers
- ✔ Low pile, less infill
- ✔ Semi-texturized fibers containing the infill
- ✔ Certified bio-system

The Slide Max diamond shaped fibers are durable yarns for high performance sports pitches. The Slide Max ST is a semi-texturized product; it combines our well known Slide Max yarns with texturized diamond fibers to better contain the infill in the pitch.

The GreenFields Slide Max ST, with a pileheight of only 40mm, is a low pile product which only needs around 15mm of performance infill in combination with sand stabilization infill and a shockpad. That is half of the amount of infill needed in traditional 60mm systems. The high performance texturized fibers, keep the infill in place both in a horizontal direction and it reduces infill splash.

The product reduces the ecological footprint of traditional 3G systems and is very low maintenance. It is also available in a certified bio-system with bio-sourced infill and a bio-based shockpad. The Slide Max ST is an ideal solution for amateur and semi-professional clubs or community use.

“

GreenFields was focused on quality and high attention to detail throughout the installation.
