INTRODUCING A NEW PLAYING EXPERIENCE WITHOUT CONVENTIONAL INFILL

GREENFIELDS FT XP 32 NF

Key benefits:

- No infill
- Minimal maintenance requirements
- Ultra durable due to the XP fibre
- High usage possible due to strength of tape fibre

GreenFields FT XP 32 NF has been specifically developed without the need for traditional infill. Designed with the most advanced fibrillated tape fibre, XP, offering extremely high durability and resilience thanks to the patented production process.

A polyethylene rooting zone in this non-infill turf system ensures long lasting consistent play and an alternative playing experience without infill splash. Although infill is not required, an optional sand dressing can be added to improve surface stability.

GreenFields FT XP 32 NF is ideal for high usage community fields and multi-sport applications where infill is not desired and where maintenance is sparse. Occasional brushing of the pitch is recommended as part of a simple, low maintenance programme.

“

Their attention to detail was excellent and GreenFields were a pleasure to work with.
