GREENFIELDS DT ELITE

DOUBLE-TUFT TECHNOLOGY FOR A NATURAL APPEARANCE AND ELITE PLAY

Key benefits:

- Improved infill distribution reducing player injury
- Natural look due to the mix of three fibres
- High resilience due to the patented Evolution yarn
- Strong durability and excellent split resistance
- 100% recyclable into RTA

The GreenFields DT Elite turf system has the optimum fibre combination of Evolution, trilobal and diamond shaped fibres to provide professional playing characteristics. The three different shapes in three shades of green and different pile lengths result in a natural grass appearance.

The patented Double Tuft technology enables more fibers and higher dtex per tuft for a more natural yarn spread. It ensures better infill distribution thanks to an open matrix structure in the carpet which gives the infill space to move. This prevents compaction or too much rotational resistance. The matrix structure also ensures an even distribution of fibres over the carpet with consistent performance in all directions. The voluminous bundles close the system at the top to reduce infill splash.

The carpet is 100% recyclable into RTA to be re-used for multiple applications.

GreenFields DT Elite is ideal for amateur up to (semi-)professional clubs who have a high rate of usage and require a professional playing surface with an emphasis on a natural look.

YOUR PERFORMANCE

This GreenFields performance chart gives a first indication of the relative performance compared to our other products in the same category. GreenFields offers a perfect pitch for every player, and can provide a product that best suits your needs. For further advice, please consult your GreenFields sales representative.

BALL SURFACE INTERACTION

Covers the relative performance for vertical and angled ball rebound, ball roll and shock absorption.

PLAYER SURFACE INTERACTION

Reflects the relative score on optimal grip, skin comfort, hardness and surface impact.

SUSTAINABILITY

Covers infill sustainability, potential infill migration, material footprint and recyclability.

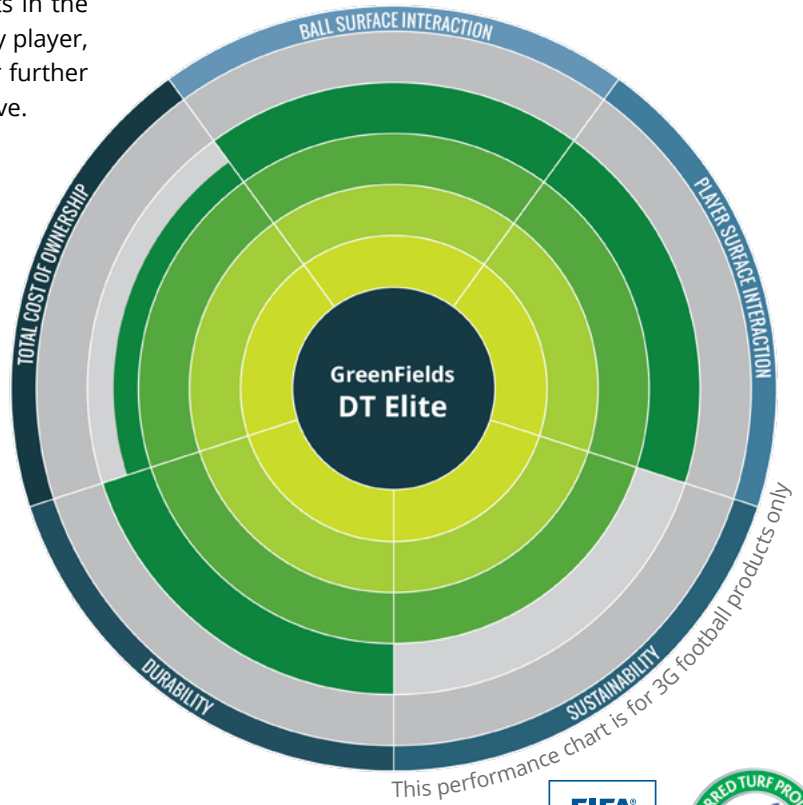

DURABILITY

Reflects the relative durability of the carpet in terms of fibre wear and strength, color fastness and yarn bind.

TOTAL COST OF OWNERSHIP

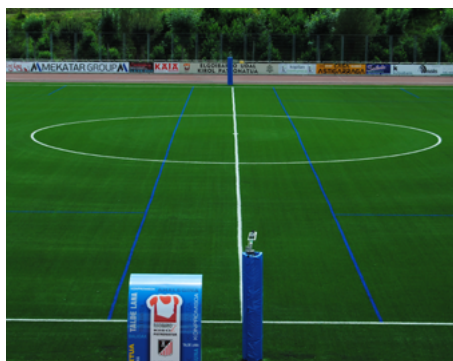

Reflects the relative costs of the carpet, system components, maintenance and end of life.
