

SUITABLE FOR

FOOTBALL

GREENFIELDS MX ULTIMATE

DESIGNED FOR PROFESSIONAL PLAYERS,
WITH PROFESSIONAL PLAYERS

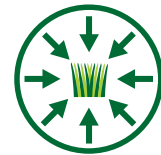

Key benefits:

- Woven technology ensures superior yarn bind
- Trio of fibres provide an elite playing performance
- Natural appearance in three tones of green
- Texturized fibres contain and support the infill layer
- 100% recyclable into RTA

GreenFields MX Ultimate is a high-tech woven system offering the very best performance characteristics specifically designed for professional players. The patented woven technology results in an extremely high yarn bind, stronger than traditional tufted products. This forces the fibres to stand even straighter and more closely resemble natural grass.

The random woven carpet with the high number of filaments in different shapes and tones of green result in a natural appearance and equal performance in all directions. The strong yarn bind reduces the need for high amounts of coating; the MX Ultimate has around 5% BX coating to prevent edge fray when installing and with its unique formula results in a superior joint strength. The combination with a texturized fibre ensures infill containment in the carpet, supporting the infill layer resulting in consistent performance and reduced maintenance. The carpet is easy to recycle into quality polyolefin granules, suitable for new high-end applications.

GreenFields MX Ultimate is a truly unique premium product for top class venues to offer the best in performance, aesthetics and durability.

HIGH DENSITY FIBRES

NATURAL BALL ROLL

NATURAL LOOK AND PLAYING EXPERIENCE

LOW MAINTENANCE REQUIRED

FULLY RECYCLABLE

YOUR PERFORMANCE

This GreenFields performance chart gives a first indication of the relative performance compared to our other products in the same category. GreenFields offers a perfect pitch for every player, and can provide a product that best suits your needs. For further advice, please consult your GreenFields sales representative.

BALL SURFACE INTERACTION
Covers the relative performance for vertical and angled ball rebound, ball roll and shock absorption.

PLAYER SURFACE INTERACTION
Reflects the relative score on optimal grip, skin comfort, hardness and surface impact.

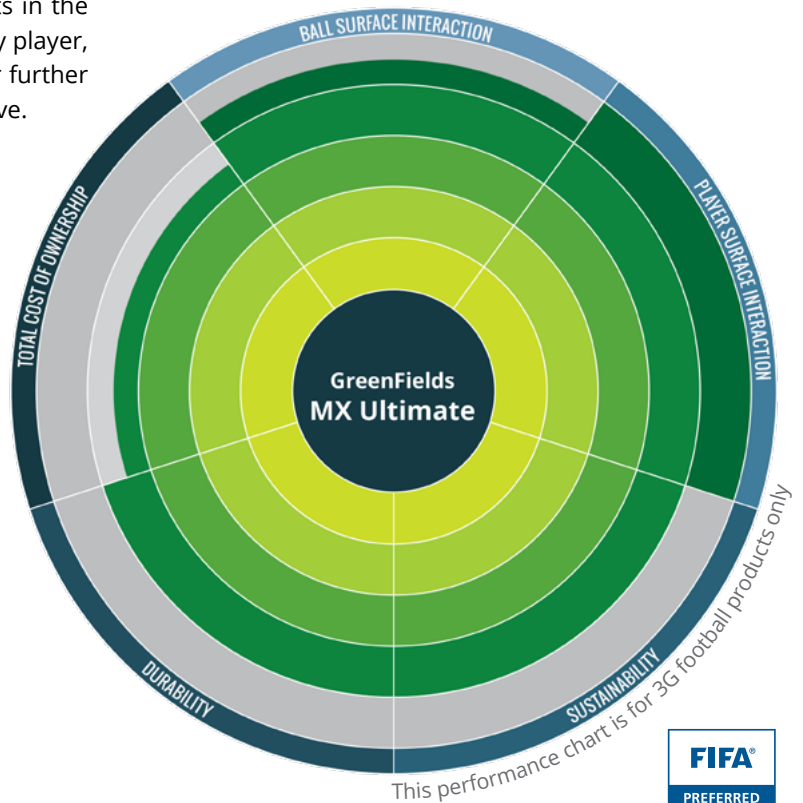

SUSTAINABILITY
Covers infill sustainability, potential infill migration, material footprint and recyclability.

DURABILITY
Reflects the relative durability of the carpet in terms of fibre wear and strength, color fastness and yarn bind.

TOTAL COST OF OWNERSHIP
Reflects the relative costs of the carpet, system components, maintenance and end of life.

GREENFIELDS MX ULTIMATE REFERENCE

Together with our colleagues at the Centre for Turf Innovation, we work closely with the end user to evolve the future of our woven products. These collaborations give us the insight we need to improve our products of today and to create the products for tomorrow.

During the design of the MX Ultimate, we thoroughly analysed yarn configurations, infill options, shock pad design and how all elements behave together. Our design took into consideration the sustainability of the components including how they could be recycled end-of-life.
