

ULTIMATE WATER BASED HOCKEY SYSTEM FOR PROFESSIONAL PLAY

GREENFIELDS TX ELITE

Key benefits:

- High speed play from 1.5 million fibres per m²
- Reduced water usage due to multi-layer backing
- Stabilised surface due to trio layer backing
- Excellent foot grip from dense tuft
- Also available in blue for FIH certified televised pitches.

Developed in collaboration with top hockey players, the new GreenFields TX Elite offers the best in class solution for professional play at the highest level. Proud to be the most densely tufted product in the industry, this elite water based system provides the ultimate smooth playing surface combined with high speed, incredible precision and control.

The short, wide texturised monofilament fibres create a multi-directional pitch. A proprietary multi-layer backing improves water retention and reduces consumption resulting in a consistently high-speed game.

Classified by the FIH as the Global Elite standard, the optimum surface type for competitive tournaments. GreenFields TX Elite is proud to set the new standard for premier level matches and is perfect for major international competitions.

“

The new field is magnificent, really fast, doesn't bounce and once played on it's totally perfect.

”
